BAIT-US-SALAM UPDATES **VOLUNTEERS COMMENTS AND FEEDBACK**

BWT has a huge network of volunteers who carry out most of its daily & task related operations. Here is what some of our volunteers, working on the forefronts, have to say

about the ongoing works. 'I went to Nawabshah rail-way station to load the volunteers, AMAZING way station to load the goods sent by Baitussalam Trust for the flood victims from the train to the PAF truck. The door of the bogie had been opened and all the volunteers including me were ready. That suding at the gate of the bogie raised the slogan Takbeer in a loud voice. And the volunteers and employees of the Air Force who were there responded with a resounding Allahu Akbar. Seeing this charming scene, I immediately took out my mobile camera and made this video. Pakistan Zindabad slogan was raised and then

the work started with a

strange spirit and agility. I

also started working and my

the trucks filled up and left During the return journey, I saw this video again on my mobile phone and thought that this is a unique trait in our nation too. Slogan TakbeerAllahu Akbar and Long live Pakistan. These words put a wonderful energy in the nation and we are ready to put our heart and soul. Perhaps these are the words whose practical picture we are seeing during the recent floods, that the nation is actively participating in the aid and service for its Pakistani Muslims and is making a new history in spending its life and wealth. Alhamdulillah May Allah Ta'ala keep this country and nation always united and like one body. Pakistan Zindabad!

CLIMATE CHANGE

Latest Interesting Facts

From atmospheric CO2 and ocean level rise to global warming and air pollution. Here are some interesting climate change facts that most people are not aware of.

1. We Are Certain We Caused It

It was recently found that air pollution kills more than 9 million people per year. Developing hotspots in South Asia and Africa will be dealing with poor air quality for years to come, but there is a silver

How are we so certain? It took a while, but climate modelling is now refined enough to predict how things would go without gases into the atmosphere to warm it by 1.5C already, but fine particles have kept it around 1.1C so far.

Only around 125,000 years ago, a time prior to the last ice age, might have had
