## Importance of Unity in Islam

There is so much we can gain just by uniting in good. Our Prophet (SAW) was a man of unity. He ensured that he spread love and kindness wherever he went, and just through these actions, he attracted millions of people to join the religion of Islam.

The power of unity is so vast, that just by coming together, we can change lives. We can uplift those who are feeling down and we can create a sense of belonging to those vulnerable and those who feel alone. Here are some ways in how we can attain unity to better ourselves and improve our interactions with others.

**1. Unity teaches us to be selfless**

"None of you will have faith until he loves for his brother what he loves for himself" [Al-Bukhari]

This type of love is quite unique. Liking for others what one would love for self teaches empathy, equality and justice. It also hints at inviting non-believers to Islam because as a Muslim, our faith should be the most beloved to us as it encompasses the love for Allah (SWT) and His beloved Prophet (SAW). This is the essence of unity, bringing together people from all walks of life and making them bond through love and respect.

**2. Knowing that we are like a structure**

Our Prophet (saw) said, "Verily, the believers are like a structure, each part strengthening the other," and the Prophet clasped his fingers together. [Al-Bukhari]

This hadith highlights the importance of supporting one another during times of need willingly and sincerely. It also involves expressing a sense of joy and pleasure when helping one another, seeing it as an honor to be able to fulfill someone else's need.

This strengthens bonds between people. Even if you were to help someone less fortunate, in a completely different country, though you may not know the beneficiary in person, they will naturally have some sort of love for you and make dua for you for the peace you've brought into their life. Attaining unity is therefore, not restricted. And just by viewing the believers as bricks that come together to build a structure, allows us to understand and visualize that so much good can come out of just supporting one another and being aware of each other's conditions.

**3. Uniting through breaking bonds**

Unity is key, but it involves efforts from every individual, just how Allah (SWT) mentions in the Quran,

"And hold firmly to the rope of Allah all together and do not become divided. And remember the favor of Allah upon you - when you were enemies and He brought your hearts together and you became, by His favor, brothers." [3:103]

Our Prophet (SAW) was a true inspiration in living the above verse. Being in a leadership position, he faced immense criticism to the point that he was pelted with stones, drenched in dirt and dust, and even his life was put in danger many times. Yet, our Prophet (SAW) showed nothing but kindness and respect back to his enemies. He used kindness to change the world and create legacies that continue to live with us today. It was his kindness that made one of his worst enemies, Umar ibn al-Khattab (ra), to be one of his closest friends, a khalifa and one of the ten promised paradise.

Such is the power of kindness, in which unity can be achieved and love can be spread far and wide.

**4. Unity through giving to Charity**

"The parable of the believers in their affection, mercy, and compassion for each other is that of a body. When any limb aches, the whole body reacts with sleeplessness and fever." [Al-Bukhari]

The love that a Muslim harbors in his heart should be so sincere that it makes him give towards those in difficulty. He feels the ache of another person and he reacts in the kindest of ways. This brings forth affection, mercy and compassion naturally towards others. In a tough world which holds obstacles of conflict, natural disasters and millions of less fortunate people, it is vital we spread love to unite in goodness. It is in these times that Allah (SWT) has commanded us to help those who are in desperate need. It is in these times where we can unite to uplift others and bring good to the world. Through unity, we can make a huge difference.

Through unity, a lot can be achieved. Unity brings people together, creating love, harmony and generosity between them. As believers, we can use unity as a platform to spread kindness to others, as well as an opportunity for our spiritual growth to become closer to Allah (SWT).

So, let's reflect on the virtues of unity, allowing us to spread sincere kindness to our family, friends, humanity and the precarious world we inhabit.

May Allah (SWT) allow us to unite in goodness, love and generosity. May Allah (SWT) allow us to enlighten those in desperate need with hope and may He maintain love in the bonds we have within our kinship and brotherhood.

## NEWS & VIEWS Artificial Intelligence Changes the Education Dynamics

Artificial intelligence (AI) is hastily converting the world around us, and training isn't any exception.

AI is being used in education to personalize getting to know, provide feedback, and automate obligations. It is likewise getting used to creating new mastering stories that were no longer viable before.

There are many blessings to using AI in schooling. AI may be used to personalize gaining knowledge for every student. This means that students can learn at their personal tempo and recognition in the regions where they need the most help. The advantage is mostly to assist overwhelmed teachers that are presently done by means of instructors. This should cause activity displacement for teachers, even though it is able to also result in new jobs inside the development and renovation of AI structures. AI has the ability to revolutionize schooling. It can be used to customize mastering, offer comments, automate tasks, and create new mastering stories. However, there also are a few challenges related to the usage of AI in education, consisting of fee, bias, privacy, and task displacement. It is essential to cautiously take into account the blessings and drawbacks of AI before adopting in the educational sector.

## Events Updates from Raudhatussalam

Alhumduillah! We at Raudha tus Salam have successfully completed our first term and students have given a good healthy competition to each other.

The young kids really enjoyed celebrating their blue day and green day by doing many recreational activities according to the theme.

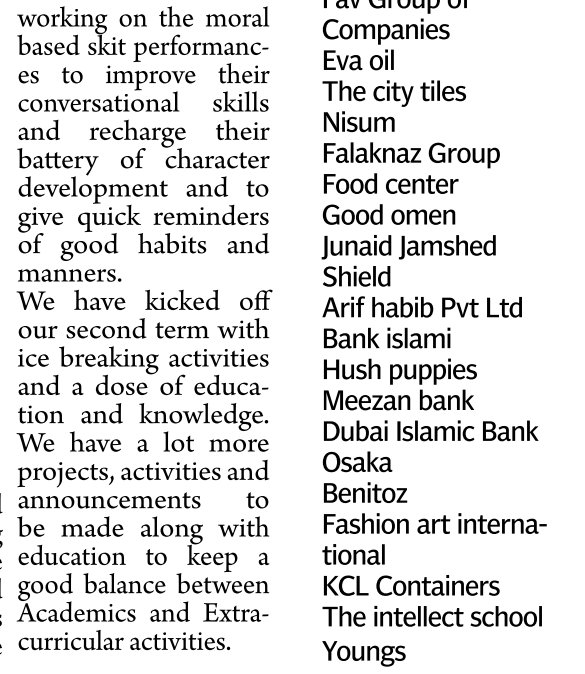

To instill the habit of salah in them we conducted a 40 day Salah tracking competition in which they had to offer daily prayers regularly and the best part was that they had to take care of the prayer time too. The winners of the competition were awarded.

The science department even conducted some of these interesting experiments

working on the moral based skit performances to improve their conversational skills and recharge their battery of character development and to give quick reminders of good habits and manners.

We have kicked off our second term with ice breaking activities and a dose of education and knowledge. We have a lot more projects, activities and announcements to be made along with education to keep a good balance between Academics and Extracurricular activities.

with amazing outcome. model of hydraulic ing on crochet knitted dents have participated with the experiments con- brakes. The experiments conducted with the science department even conducted some of these interesting experiments

## Interesting Facts About Masjid Al-Aqsa

**1. It isn't just one mosque**

There are in fact multiple mosques on the site that we know as Masjid Al-Aqsa. We tend to think of Masjid Al-Aqsa as the building at the southernmost corner of the mosque. In actual fact, that is the Qiblah Mosque – so called because it is the closest to the Qiblah. The whole complex is known as the Blessed Masjid Al-Aqsa. It is also referred to as Al-Haram ash-Sharif (the Noble Sanctuary).

**2. It is mentioned in the Quran**

In fact, the Ka'bah and Masjid Al-Aqsa are the only two masjids mentioned in the Quran - and they are even referenced side by side when Allah (swt) speaks of the Night Journey and Ascension.

**3. The original Dome of the Rock looked very different.**

The Dome of the Rock was built by the Umayyad ruler Abdul Malik ibn Marwan. It was originally wooden with either a brass, lead or ceramic cover. The iconic dome we all know was built during the reign of the Ottoman ruler, Sulaiman the Magnificent. The distinctive gold layer was added to the dome along with the Ottoman tiles to the facade of the building.

**4. The complex is also a burial ground**

Though there is no accurate record of who and how many have been buried here, the burial ground in Al-Haram as-Sharif is the resting place for many prophets (AS) and Sahabah of the Holy Prophet (SAW).
